Page Table: 3D Printing Tutorial

Priority 1 Content: Preparing your object

Step 1:
- Creating a model of desired object(s)
- Make an appointment with Dominican University's Media Center (2 hours designed for this)
- Download anything previously created
- Save objects as .STL or .OBJ files

Step 2:
- Students or faculty members should save or print objects on their own computers if unable to print immediately

Priority 2 Content: Specifications
- Printing requests must be sent to mediacenter@dom.edu
- Allow five days for processing
- Media Center specifies "objects must not exceed 9 inches across, 6 inches deep, and 5.7 inches tall"

Priority 3 Content: Video Tutorial
- Embedded instructional video describing the basics of 3D printing

Page Objective: This page includes information regarding the creation, saving, and printing of 3D objects

Source Content: Dominican University 3D printing guide

Phase: 3 launching

SME/Content Owner: Rebecca Crown Library

Content Creation Implementation: This content is fully available; final modifications are in the implementation stage

Maintenance and Frequency: This will occur daily with fluctuations in inquiries, projects, and course offerings at Dominican University's Undergraduate and Graduate Departments.

Outstanding questions/risks: None
